"Besides looking at tiny water creatures and learning about planetary science, I'm active in public engagement in

community centers, classrooms and youth groups," Denton said. "Increasing science literacy is a personal passion."

Denton will also provide a free talk on Odonata Odyssey: Nevada's Dragonfly and

Damselfly Diversity" on Feb. 12. The free presentation starts at 6:30 p.m.

Odonates, informally known as dragonflies and damselflies, are insects with an aquatic larval stage and
