

Ready to Rock Kinder

Parent Information Nights

Parent Information Nights include information on how to help your child this summer to be **Ready to Rock Kinder**: providing some activities, skills, and resources to make practicing fun!

Kindergarten is the first formal step in a child's education, and the skills and abilities that they bring can greatly affect their future academic success.

Being ready for kindergarten means that a child has developed a certain level of independence including: social, emotional, and physical skills that are necessary to succeed in a classroom setting. These skills include things like basic letters and numbers, the ability to follow instructions, how to communicate with others, and how to work well in a group.

Children who are not fully prepared for kindergarten may struggle to keep up with their peers, which can lead to frustration, low self-esteem, and a dislike of school.

By making sure that your child is kindergarten ready, you are giving them the best possible start to their educational journey. This means that they are more likely to be engaged and motivated learners. It is important that parents take an active role in their child's early learning and work with them to help them acquire the skills they need to succeed in Kindergarten and beyond!

Information will also be available about Ready to Rock Kinder Summer School.

For more information please contact your child's school:
